ABOUT KARNAVATI UNIVERSITY

Karnavati University (KU) is an InTECHgrated University in Gandhinagar, Gujarat, India, offering under-graduate and graduate degrees for domestic and international students.

KU is a dynamic and growing university defined by its close connections to the professional community and a commitment to outstanding student education. We create the most innovating, dynamic and creative yet practical learning environment for students. Spread over a 30+ acres 'green' campus, KU provides excellence in education through its Colleges namely.

Unitedworld Institute of Design

UID offers world-class design education to create professionals who can help meet India's diverse design needs. UID aims at fostering strategic design linkages of innovation and entrepreneurship with various sectors of the industry. Our students are encouraged to pursue innovation led design practices.

Unitedworld School of Business

UWSB's programme aims at laying a solid foundation for its students to pursue higher education in management at Master's and Doctoral levels or succeed in the world of business. The programme is designed to provide holistic education, as it imparts fundamental knowledge of business and management principles to its students.

Unitedworld School of Law

Unitedworld School of Law (UWSL) offers integrated B.B.A. LL.B (Hons.) programme which contributes to the broader faces of education combining the subjects of Management Studies and Law. Students are exposed to knowledge in the field of Law, Business, IT, Banking, Finance, Management, Human resource, Corporate Governance, Investment and Competition.

Karnavati School of Dentistry

KSD persistently works towards producing top-notch clinical practitioners in dentistry. It provides recognized degrees of Bachelor of Dental Surgery (B.D.S.), Masters of Dental Surgery (M.D.S.) and Ph.D. in Dentistry as per the norms set up by Dental Council of India and Gujarat University.

Unitedworld School of Computational Intelligence

Data Science is the core part and heart of Data Analytics, Artificial Intelligence & Machine Learning, Robotics Design & Automation, and Blockchain. These emerging technology buzzwords has started transforming and reshaping the world digital business. The demand for Data Scientists, Data Analysts, AI and ML Engineer, Robotics Engineer and Blockchain Developers, etc. is consistently growing from 5% in 2017 to 40% in 2025, across all sectors.

Unitedworld School of Liberal Arts and Mass Communication

The courses of USLM have been meticulously planned – both for Liberal Arts and for Mass Communication. The first two semester prepare the base, while in the third year- which is a trimester-the students choose their areas of specializations – for Liberal Arts, it can be People in Societies, or History and International Relations, or Business Studies, or Economics & Public Policy, or Communication & Aesthetics. For Mass Communications students, they can specialize in Broadcast Journalism & Film Studies, or in Advertising & Public Relations, or in Print & Cyber Journalism. The students have the option of studying the fourth year as an Advanced Diploma to make them eligible to study in foreign universities.

Karnavati School of Research

Karnavati University offers doctoral programme (Ph.D.) which is designed as per global standards. The University promotes innovation and excellence in educational research and development. The university provides ample opportunities to support and develop research inclination among students, subject supervisors and research scholars. Doctoral students at Karnavati University are encouraged to pursue problem-oriented studies, and utilize advanced research methods to address real world problems. The research scholars are encouraged to work with international subject experts so as to understand the global scenarios of their research area.

The Unitedworld School of Computational Intelligence (USCI), with its world class state of the art facilities, offers 3-year Undergraduate (UG) honours programmes.

Defence Design & Technology Incubator of India (DDTII)

DDTII is a design centric technology incubator to support and promote start-ups focused on products and services for defence applications. It is a scintillating environment for technology, business and entrepreneurship for start-ups who would like to explore or venture into the Aerospace and Defence sector. The incubator supports Green-Field as well as Brown-field start-ups. The incubator is promoted under Defence Design & Technology Incubator of India Foundation which is a not-for-profit Company registered under Section 8 of the Companies Act, 2013. DDTII is an Atal Incubation Centre (AIC) as per the guidelines issued by Atal Innovation Mission, NITI Aayog and a Technology Business Incubator (TIB) in collaboration with Department of Science and Technology (DST). Objective of the DDTII is to support innovative start-up ideas in the area of Defence Design & Technology across India. DDTII is located within the green campus of Karnavati University in Uvarsad, Gandhinagar-Ahmedabad twin city.

Karnavati Innovation and Incubation Foundation (KIIF)

KIIF is a design business incubator that works on an amalgamation of design, technology and business principles. Located within the campus of Karnavati University, it has been formed to help start-ups and entrepreneurs in their journey towards becoming successful businesses. Through its hallmark business assistance services, it would render much needed support to companies sprouting their way into the business world. The incubated companies will have access to corporate like workspaces, domain expert mentors and cutting-edge labs to take their idea to emerge out into a successful and profitable business venture.

About Youth Parliament

YOUTH PARLIAMENT OF INDIA - A FORUM FOR DEMOCRATIC DIALOGUES

is an invitation to all colleges to interrogate the present, to learn from the past and to prepare the future of India.

Why?

It is often said that widespread apathy exists among the younger generation towards political participation and parliamentary democracy. Whether this fear is exaggerated or not, without doubt young people need to understand the principles which underpin democracy and civil society, develop the skills to use that knowledge effectively and be able to participate in the appropriate fora. One method of assisting young people to understand these principles is through a Youth Parliament which allows the youngsters to voice their ideas and opinions on topics. The youth of the nation are trustees of prosperity. Youth force is dynamic in nature as most skills and orientation are required in this age. Youth is a huge reservoir of energy which need to be tapped and harnessed intelligently for the development of society. Policy makers all over the world formulate policies in respect of youth to enhance and streamline their energy.

The Youth Parliament is a real opportunity to make one's own opinions felt and to learn for one self the benefits of operating in a democratic framework while introducing the youth to their social responsibilities.

Objective

With an objective of strengthening democracy and to enable the student community to understand the working of our parliament the Youth Parliament of India is being organised.

Vision

To create a forum where various stakeholders of the society can interact and debate upon various political and social issues and strives to create a path to the solution for the same.

Mission

To expose the youth to politics, dialogue and democracy and provide them a platform to understand and serve the society

Thank you for your **BLESSINGS AND INSPIRATION**

Prime Minister

MESSAGE

I am pleased to know that the Youth Parliament of India, 2018 is being organized at Karnavati University, Gandhinagar.

Success of a parliamentary democracy is predicated on the quality of the discussions and debates which eventually shape policies. Initiatives like Youth Parliament will surely help them to acquire those skills and equip them to take on the mantle of a New India.

I convey my best wishes for all the participants to showcase their views and parliamentary acumen at the event. Best wishes for the successful organization of the Youth Parliament of India, 2018.

(Narendra Modi)

MESSAGE FROM UNIVERSITY PRESIDENT'S DESK

RITESH HADA
*President, Karnavati University
Member, Governing Council,
Youth Parliament of India*

The youth of the nation are the trustees of prosperity. Through Youth Parliament, we have decided to tap this huge reservoir of energy and harness it for the development of the society.

Some distinguished members from public service, media, academia, health, arts and sports had graced the previous editions of the Youth Parliament of India.

Some brilliant speakers from the student community had put forth their ideas and arguments in front of a gathering of over 4000 people. I am certain that the Youth Parliament has set a benchmark in the celebration of democracy.

MESSAGE FROM CHAIRMAN'S DESK

We need to empower the youth to empower the nation. Youth Parliament is a much needed democratic platform for the youngsters of today. Previous editions of the Youth Parliament of India saw a rich discussion on various socio-political topics between senior statesmen and the youth. Youth Parliament is a great forum to learn from the past and prepare for the future

Dr. RUTVIJ PATEL
*Chairman, Governing Council,
Youth Parliament of India
Co-Spokesperson, BJP Gujarat*

**CURRENTLY, INDIA HAS
THE LARGEST SHARE
OF YOUTH POPULATION
IN THE WORLD
AND WILL CONTINUE TO
HOLD SO FAR
THE NEXT 20 YEARS**

The Indian Youth

India represents a substantial share of the world population. By 2010, India accounted for 17.8% of the world population, recording an increase of 2.7% in its share since 1970. This arguably means that every 6th person in the world is an Indian. The growth in population share is projected to continue and by 2030, Indians would account for about 18.0% of the global population. India is expected to have 34.33% share of youth in total population by 2020.

Advantage India

It is observed that India has a relative advantage at present over other countries in terms of distribution of youth population. India's advantage in young population is also evident when it is compared with other Asian Countries.

India is seen to remain younger longer than China and Indonesia, the two major countries, other than India which determine the demographic features of Asia.

Need and Relevance

Youth being enthusiastic, vibrant, innovative and dynamic in nature is the most important section of the population. Youth shows strong passion, motivation and will-power which also make them the most valuable human resource for fostering economic, cultural and political development of a nation. A country's ability and potential for growth is determined by the size of its youth population. The energy and passion of the youth if utilised properly, can bring huge positive change to the society and progress to the nation. Youth are the creative digital innovators in their communities and participate as active citizens, eager to positively contribute to sustainable development. This section of the population needs to be harnessed, motivated, skilled and streamlined properly to bring rapid progress for a country.

2025 - near or far?

CHANGES IN SOCIETY

Since the year 2000, information has become more widely accessible than ever before, reinforcing the demand for transparency and accountability. A generation of "digital natives" have grown up using social networks to connect and mobilize with their peers locally, nationally and across borders. Young people frustrated by authoritarian leaders and the lack of opportunities have sought radical change to the political system in their country. Many who have seen their jobs threatened by globalization have begun to look to populists as an alternative to the political establishment.

CHANGES IN POLITICS

New political movements have emerged to challenge the way politics is done and have acceded to positions of power in some countries. Such factors and many more combine to make this a time of challenge and opportunity for democracy. Political parties, parliaments and other institutions are called upon to adapt to changes in society, to renew political processes, to create space in politics for younger generations and to make use of their energy.

THE NEED FOR MORE DEMOCRACY

The aspirations for a fairer nation that are set out in the 2025 agenda for sustainable and inclusive development will only be met if there is more democracy, not less. Political leaders everywhere need to make the connection between the internationally agreed development goals and the demands from their citizens, including for greater transparency and accountability as well as more participative and inclusive decision-making.
